Classification Description

PSYCHIATRIC MENTAL HEALTH NURSE PRACTITIONER (PMHNP)

General Summary

PMHNPs are responsible for diagnosing mental illness, interpreting data and facilitating treatment planning, including prescribing medication when needed. Acting as support for patients and their families is also crucial. In addition, these practitioners may assume the role of therapist for their patients and manage the delivery of psychiatric services to their patients. They often complement the role of a General Practitioner and multidisciplinary team while promoting the development of an advanced nursing practice.

Psychiatric Nurse Practitioner I

Jobcode: HPMH26

Pay Band: HK

FLSA Status: FLSA status may be determined to be different at the agency level based on the agency's utilization of the position.
